Rain Harvesting™

wireless tank gauge

Monitoring Rainwater from within the Home or Office

- Simple set up
- Transmits a signal wirelessly to the receiver up to 100 metres away
- Measures the tank level utilising a reliable solid float system that does not rely on ultra-sonic beams - will not interfere or snag on any internal components
- Easy read dial with "Empty" and "Full" indicators
- Suitable for all vented tanks up to 3 metres tall (includes underground tanks)

Code	Description	Barcode
TAWG01	Wireless Tank Gauge	9317118960135
