

Installation

WHAT'S IN THE BOX?

- Flap Valve

TOOLS/MATERIALS YOU MAY REQUIRE

- Silicone (optional)
- Solvent weld glue (optional)

FOR A TANK OVERFLOW OUTLET OR TANK OVERFLOW OUTLET PIPE

1. Select an installation point for your Flap Valve. It can be attached directly to your tank overflow outlet, or to your horizontal tank overflow outlet pipe.
2. Orient your Flap Valve so the hinge is at the top, then secure directly to your chosen installation point with silicone or solvent weld glue.

FOR A NON-PLUMBED TANK INLET PIPE

1. Orient your Flap Valve so the hinge is at the top, then secure directly to your non-plumbed tank inlet pipe with silicone or solvent weld glue.

MAINTENANCE

Your Flap Valve is self-closing and largely self-cleaning, so it requires little to no maintenance. If maintenance is required, simply hose or brush off the flap or mosquito-proof stainless steel vented screen.

Flap Valve

Installation and Specification Guide

PRODUCT DETAILS

Keep mosquitoes, frogs and pests out of your tank inlet and outlet pipes without restricting water flow.

- TAFV01 50mm - vented plastic
- TAFV02 90mm M - vented stainless steel
- TAFV12 90mm F - vented stainless steel
- TAFV03 100mm - plain plastic
- TAFV04 100mm - vented stainless steel

FEATURES AND BENEFITS

- Keep mosquitoes, frogs and pests out of your tank inlet and outlet pipes and your Rain Harvesting system
- Self closing flap can open fully during high flow events so water flow is not impeded.
- Improve ventilation and oxygen circulation in your rainwater tank (vented models)
- Made from UV-stabilised UPVC for longevity
